

## Torre de la Horadada

Price: 1 980 000 €

With the studied design of the villa based on clear, cubic and functional lines, the Swiss architect MASSIMO DI CAUDO is trying to break with the traditional housing construction that is characteristic of Spain. Thanks to the design and distribution of the interior spaces, each living space is provided with a microclimate, which, together with the thermal and acoustic insulation of the villa, creates a harmonious and comfortable environment, with special emphasis on sustainable and respectful housing with the environment. Thanks to the design and distribution of the interior spaces, a microclimate is added to each living environment. space, together with the thermal and...
